# IGS-9080 Series

## Industrial 8-port managed Gigabit Ethernet switch with 8x10/100/1000Base-T(X)

### Features

- Supports O-Ring (recovery time < 30ms over 250 units of connection) and MSTP(RSTP/STP compatible) for Ethernet Redundancy
- Open-Ring support the other vendor's ring technology in open architecture
- O-Chain allow multiple redundant network rings
- Supports standard IEC 62439-2 MRP (Media Redundancy Protocol) function
- Supports IEEE 1588v2 clock synchronization (-NP model is not supported)
- Supports IPV6 new internet protocol version
- Supports Modbus TCP protocol
- Supports IEEE 802.3az Energy-Efficient Ethernet technology
- Provided HTTPS/SSH protocol to enhance network security
- Supports SMTP client
- Supports IP-based bandwidth management
- Supports application-based QoS management
- > Supports Device Binding security function
- Supports DOS/DDOS auto prevention
- > IGMP v2/v3 (IGMP snooping support) for filtering multicast traffic
- Supports SNMP v1/v2c/v3 & RMON & 802.1Q VLAN Network Management
- > Supports ACL, TACACS+ and 802.1x User Authentication for security
- Supports 9.6K Bytes Jumbo Frame
- > Multiple notification for warning of unexpected event
- > Web-based ,Telnet, Console (CLI), and Windows utility (Open-Vision) configuration
- Supports LLDP Protocol
- Rigid IP-30 housing design
- > DIN-Rail and wall mounting enabled

#### Introduction

IGS-9080 series are managed redundant ring Ethernet switches with 8x10/100/1000Base-T(X) copper ports. These switches support Ethernet Redundancy protocol, O-Ring (recovery time < 30ms over 250 units of connection) and MSTP (RSTP/STP compatible) can protect your mission-critical applications from network interruptions or temporary malfunctions with its fast recovery technology. And support wide operating temperature from -40 °C to 70 °C. IGS-9080 series can also be managed centralized and convenient by Open-Vision, Except the Web-based interface, Telnet and console (CLI) configuration. Therefore, the switch is one of the most reliable choices for highly-managed Ethernet application.

• <u>O-Ring</u>: O-Ring is ORing's proprietary redundant ring technology, with recovery time of less 30 milliseconds and up to 250 nodes. The O-Ring redundant ring technology can protect mission-critical application from network interruptions or temporary malfunction with its fast recover technology.

Spectra GmbH & Co. KG vertrieb@spectra.de

\* All specifications are subject to change without notice.

- <u>Open-Ring</u>: Open-Ring is an enhanced redundant technology that makes ORing's switches compatible with other vendor's proprietary redundant ring technologies. It enables ORing's switches to form a single ring with other vendor's switch. In cases where the ring is setup using proprietary technology, ORing offers a compatibility service where ORing can make its switches compatible with your particular network requirements.
- <u>O-Chain</u> : O-Chain is the revolutionary network redundancy technology that provides the add-on network redundancy topology for any backbone network, O-Chain allows multiple redundant network rings of different redundancy protocols to join and function together as a larger and more robust compound network topology. O-Chain providing ease-of-use while maximizing fault-recovery swiftness, flexibility, compatibility, and cost-effectiveness in one set of network redundancy topology.
- <u>MRP</u>: Media Redundancy Protocol (MRP) is a data network protocol standardized by the IEC 62439-2. It allows rings of Ethernet switches to overcome any single failure with recovery time much faster than achievable with Spanning Tree Protocol.
- <u>IP-based Bandwidth Management</u>: The switch provide advanced IP-based bandwidth management which can limit the maximum bandwidth for each IP device. User can configure IP camera and NVR with more bandwidth and limit other device bandwidth.
- <u>Application-Based QoS</u>: The switch also support application-based QoS. Application-based QoS can set highest priority for data stream according to TCP/UDP port number.
- <u>Device Binding Function</u>: ORing special Device Binding function can only permit allowed IP address with MAC address to access the network. Hacker cannot access the IP surveillance network without permission. It can avoid hacker from stealing video privacy data and attacking IP camera, NVR and controllers.
- <u>Advanced DOS/DDOS Auto Prevention</u>: The switch also provided advanced DOS/DDOS auto prevention. If there is any IP flow become big in short time, the switch will lock the source IP address for certain time to prevent the attack. It's hardware based prevention so it can prevent DOS/DDOS attack immediately and completely.
- <u>IEEE 1588v2 Technology</u>: The IEEE 1588v2 technology can fulfill precision time synchronization requirements for protection and control applications.
- Modbus TCP : This is a Modbus variant used for communications over TCP/IP networks.
- <u>IEEE 802.3az Energy-Efficient Ethernet</u>: This is a set of enhancements to the twisted-pair and backplane Ethernet family of networking standards that will allow for less power consumption during periods of low data activity. The intention was to reduce power consumption by 50% or more.

#### **Open-Vision**

ORing's switches are intelligent switches. Different from other traditional redundant switches, ORing provides a set of Windows utility (Open-Vision) for user to manage and monitor all of industrial Ethernet switches on the industrial network.

# Specifications

ORing Switch Model	IGS-9080	IGS-9080-NP			
Physical Ports					
10/100/1000Base-T(X) with P.S.E.		-			
Ports in RJ45 Auto MDI/MDIX		8			
Technology					
	IEEE 802.3 for 10Base-T				
	IEEE 802.3u for 100Base-TX				
	IEEE 802.3ab for 1000Base-T				
	IEEE 802.3x for Flow control				
	IEEE 802.3ad for LACP (Link Aggregation Control Protocol )				
Ethernet Standards	IEEE 802.1p for COS (Class of Service)				
	IEEE 802.1Q for VLAN Tagging IEEE 802.1w for RSTP (Rapid Spanning Tree Protocol)				
	IEEE 802.1% for MSTP (Multiple Spanning Tree Protocol)				
	IEEE 802.1x for Authentication				
	IEEE 802.1AB for LLDP (Link Layer Discovery Protocol)				
	IEEE 1588v2 clock synchronization				
IEEE 1588v2 cloclk synchronization	supported	unsupported			
MAC Table	8k				
Priority Queues	8				
Processing	Store-and-Forward				
	Switching latency: 7 us				
	Switching bandwidth: 16Gbps				
Switch Properties	Max. Number of Available VLANs: 256				
	IGMP multicast groups: 128 for each VLAN				
Jumbo frame	Port rate limiting: User Define				
	Up to 9.6K Bytes Device Binding security feature				
	Enable/disable ports, MAC based port security				
	Port based network access control (802.1x)				
Security Features	VLAN (802.1Q) to segregate and secure network traffic				
5	Radius centralized password management				
	SNMPv3 encrypted authentication and access security				
	Https / SSH enhance network security				
	STP/RSTP/MSTP (IEEE 802.1D/w/s)				
	Redundant Ring (O-Ring) with recovery time less than 30ms over 250 units				
	TOS/Diffserv supported				
	Quality of Service (802.1p) for real-time traffic				
	VLAN (802.1Q) with VLAN tagging IGMP Snooping				
Software Features	IP-based bandwidth management				
	Application-based QoS management				
	DOS/DDOS auto prevention				
	Port configuration, status, statistics, monitoring, security				
	DHCP Server/Client/Relay				
	SMTP Client				
	Modbus TCP				
	O-Ring				
	Open-Ring				
Network Redundancy	O-Chain MRP				
	MSTP (RSTP/STP compatible)				
DS 222 Social Canada Bast	RS-232 in RJ45 connector with console cable. 115200bps, 8, N, 1				
RS-232 Serial Console Port	K3-232 III KJ43 CONNECTOR WITH CONSOLE CADLE. 1152	ο, Ν, Ι 			
LED Indicators					
Power Indicator (PWR)	Green : Power LED x 3				
Ring Master Indicator (R.M.)	Green : Indicates that the system is operating in O-Ring Master mode				
O-Ring Indicator (Ring)	Green : Indicates that the system operating in O-Ring mode				
	Green Blinking : Indicates that the Ring is broken.				
Fault Indicator (Fault)	Amber : Indicate unexpected event occurred				
	Amber : Indicate unexpected event occurred Green for port Link/Act.				

Fault Contact					
Relay	Relay output to carry capacity of 1A at 24VDC				
Power					
Redundant Input power	Dual DC inputs. 12-48VDC on 6-pin terminal block				
Power consumption (Typ.)	11 Watts 11 Watts				
Overload current protection	Present				
Reverse Polarity Protection	Present				
Physical Characteristic					
Enclosure	IP-30				
Dimension (W x D x H)	n (W x D x H) 54.1(W)x106.1(D)x145.4(H) mm (2.13x4.18x5.72 inch.)				
Weight (g)	756 g	754 g			
Environmental					
Storage Temperature	-40 to 85°C (-40 to 185°F)				
Operating Temperature	-40 to 70°C (-40 to 158°F )				
Operating Humidity	5% to 95% Non-condensing				
Regulatory Approvals					
EMI	FCC Part 15, CISPR (EN55022) class A				
EMS EN61000-4-2 (ESD) EN61000-4-3 (RS), EN61000-4-4 (EFT), EN61000-4-5 (Surge), EN61000-4-6 (CS), EN61000-4-8, EN61000-4-11					
Shock	IEC60068-2-27				
Free Fall	IEC60068-2-32				
Vibration	IEC60068-2-6				
Safety	EN60950-1				
Warranty	5 years

### Packing List

- IGS-9080 series x 1
- ORing Tool CD x 1
- Quick Installation Guide x 1
- Console Cable x 1
- DIN-Rail Kit x 1
- Wall-mount Kit x 2

### Optional Accessories

- Open-Vision M500 : Powerful Network Management Windows Utility Suit, 500 IP devices
- DR-45 series : 45 Watts DIN-Rail power supply
- DR-75 series : 75 Watts DIN-Rail power supply
- DR-120 series : 120 Watts DIN-Rail power supply

\* All specifications are subject to change without notice.
