Regulatory Compliance Statements

This section provides the FCC compliance statement for Class A devices and describes how to keep the system CE compliant.

Declaration of Conformity

FCC

This equipment has been tested and verified to comply with the limits for a Class A digital device, pursuant to Part 15 of FCC Rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. Operation of this equipment in a residential area (domestic environment) is likely to cause harmful interference, in which case the user will be required to correct the interference (take adequate measures) at their own expense.

CE

The product(s) described in this manual complies with all applicable European Union (CE) directives if it has a CE marking. For computer systems to remain CE compliant, only CE-compliant parts may be used. Maintaining CE compliance also requires proper cable and cabling techniques.

RoHS Compliance

NEXCOM RoHS Environmental Policy and Status Update

NEXCOM is a global citizen for building the digital infrastructure. We are committed to providing green products and services, which are compliant with European Union RoHS (Restriction on Use of Hazardous Substance in Electronic Equipment) directive 2011/65/EU, to be your trusted green partner and to protect our environment.

RoHS restricts the use of Lead (Pb) < 0.1% or 1,000ppm, Mercury (Hg) < 0.1% or 1,000ppm, Cadmium (Cd) < 0.01% or 100ppm, Hexavalent Chromium (Cr6+) < 0.1% or 1,000ppm, Polybrominated biphenyls (PBB) < 0.1% or 1,000ppm, and Polybrominated diphenyl Ethers (PBDE) < 0.1% or 1,000ppm.

In order to meet the RoHS compliant directives, NEXCOM has established an engineering and manufacturing task force to implement the introduction of green products. The task force will ensure that we follow the standard NEXCOM development procedure and that all the new RoHS components and new manufacturing processes maintain the highest industry quality levels for which NEXCOM are renowned.

The model selection criteria will be based on market demand. Vendors and suppliers will ensure that all designed components will be RoHS compliant.

How to recognize NEXCOM RoHS Products?

For existing products where there are non-RoHS and RoHS versions, the suffix "(LF)" will be added to the compliant product name.

All new product models launched after January 2013 will be RoHS compliant. They will use the usual NEXCOM naming convention.

Warranty and RMA

NEXCOM Warranty Period

NEXCOM manufactures products that are new or equivalent to new in accordance with industry standard. NEXCOM warrants that products will be free from defect in material and workmanship for 2 years, beginning on the date of invoice by NEXCOM.

NEXCOM Return Merchandise Authorization (RMA)

- Customers shall enclose the "NEXCOM RMA Service Form" with the returned packages.

- Customers must collect all the information about the problems encountered and note anything abnormal or, print out any on-screen messages, and describe the problems on the "NEXCOM RMA Service Form" for the RMA number apply process.

- Customers can send back the faulty products with or without accessories (manuals, cable, etc.) and any components from the card, such as CPU and RAM. If the components were suspected as part of the problems, please note clearly which components are included. Otherwise, NEXCOM is not responsible for the devices/parts.

- Customers are responsible for the safe packaging of defective products, making sure it is durable enough to be resistant against further damage and deterioration during transportation. In case of damages occurred during transportation, the repair is treated as "Out of Warranty."

- Any products returned by NEXCOM to other locations besides the customers' site will bear an extra charge and will be billed to the customer.

Repair Service Charges for Out-of-Warranty Products

NEXCOM will charge for out-of-warranty products in two categories, one is basic diagnostic fee and another is component (product) fee.

System Level

- Component fee: NEXCOM will only charge for main components such as SMD chip, BGA chip, etc. Passive components will be repaired for free, ex: resistor, capacitor.

- Items will be replaced with NEXCOM products if the original one cannot be repaired. Ex: motherboard, power supply, etc.

- Replace with 3rd party products if needed.

- If RMA goods can not be repaired, NEXCOM will return it to the customer without any charge.

Board Level

- Component fee: NEXCOM will only charge for main components, such as SMD chip, BGA chip, etc. Passive components will be repaired for free, ex: resistors, capacitors.

- If RMA goods can not be repaired, NEXCOM will return it to the customer without any charge.

Warnings

Read and adhere to all warnings, cautions, and notices in this guide and the documentation supplied with the chassis, power supply, and accessory modules. If the instructions for the chassis and power supply are inconsistent with these instructions or the instructions for accessory modules, contact the supplier to find out how you can ensure that your computer meets safety and regulatory requirements.

Cautions

Electrostatic discharge (ESD) can damage system components. Do the described procedures only at an ESD workstation. If no such station is available, you can provide some ESD protection by wearing an antistatic wrist strap and attaching it to a metal part of the computer chassis.

Safety Information

Before installing and using the device, note the following precautions:

▪ Read all instructions carefully.

▪ Do not place the unit on an unstable surface, cart, or stand.

▪ Follow all warnings and cautions in this manual.

▪ When replacing parts, ensure that your service technician uses parts specified by the manufacturer.

▪ Avoid using the system near water, in direct sunlight, or near a heating device.

▪ The load of the system unit does not solely rely for support from the rackmounts located on the sides. Firm support from the bottom is highly necessary in order to provide balance stability.

▪ The computer is provided with a battery-powered real-time clock circuit. There is a danger of explosion if battery is incorrectly replaced. Replace only with the same or equivalent type recommended by the manufacturer. Discard used batteries according to the manufacturer's instructions.

CAUTION! Danger of explosion if battery is incorrectly replaced. Replace with the same or equivalent type recommended by the manufacturer. Discard used batteries according to the manufacturer's instructions.

Installation Recommendations

Ensure you have a stable, clean working environment. Dust and dirt can get into components and cause a malfunction. Use containers to keep small components separated.

Adequate lighting and proper tools can prevent you from accidentally damaging the internal components. Most of the procedures that follow require only a few simple tools, including the following:

▪ A Philips screwdriver

▪ A flat-tipped screwdriver

▪ A grounding strap

▪ An anti-static pad

Using your fingers can disconnect most of the connections. It is recommended that you do not use needle-nose pliers to disconnect connections as these can damage the soft metal or plastic parts of the connectors.

Safety Precautions

1. Read these safety instructions carefully.

2. Keep this User Manual for later reference.

3. Disconnect this equipment from any AC outlet before cleaning. Use a damp cloth. Do not use liquid or spray detergents for cleaning.

4. For plug-in equipment, the power outlet socket must be located near the equipment and must be easily accessible.

5. Keep this equipment away from humidity.

6. Put this equipment on a stable surface during installation. Dropping it or letting it fall may cause damage.

7. The openings on the enclosure are for air convection to protect the equipment from overheating. DO NOT COVER THE OPENINGS.

8. Make sure the voltage of the power source is correct before connecting the equipment to the power outlet.

9. Place the power cord in a way so that people will not step on it. Do not place anything on top of the power cord. Use a power cord that has been approved for use with the product and that it matches the voltage and current marked on the product's electrical range label. The voltage and current rating of the cord must be greater than the voltage and current rating marked on the product.

10. All cautions and warnings on the equipment should be noted.

11. If the equipment is not used for a long time, disconnect it from the power source to avoid damage by transient overvoltage.

12. Never pour any liquid into an opening. This may cause fire or electrical shock.

13. Never open the equipment. For safety reasons, the equipment should be opened only by qualified service personnel.

14. If one of the following situations arises, get the equipment checked by service personnel:
    a. The power cord or plug is damaged.
    b. Liquid has penetrated into the equipment.
    c. The equipment has been exposed to moisture.
    d. The equipment does not work well, or you cannot get it to work according to the user's manual.
    e. The equipment has been dropped and damaged.
    f. The equipment has obvious signs of breakage.

15. Do not place heavy objects on the equipment.

16. The equipment is intended to be supplied by DC mains, input voltage tolerance should be within 9-30Vdc and without PE connection.

17. **CAUTION:** DANGER OF EXPLOSION IF BATTERY IS INCORRECTLY REPLACED. REPLACE ONLY WITH THE SAME OR EQUIVALENT TYPE RECOMMENDED BY THE MANUFACTURER. DISCARD USED BATTERIES ACCORDING TO THE MANUFACTURER'S INSTRUCTIONS.

18. Direct contact to metal enclosure should be less than 1 second time.

Technical Support and Assistance

1. For the most updated information of NEXCOM products, visit NEXCOM's website at www.nexcom.com.

2. For technical issues that require contacting our technical support team or sales representative, please have the following information ready before calling:
   – Product name and serial number
   – Detailed information of the peripheral devices
   – Detailed information of the installed software (operating system, version, application software, etc.)
   – A complete description of the problem
   – The exact wordings of the error messages

Warning!
1. Handling the unit: carry the unit with both hands and handle it with care.

2. Maintenance: to keep the unit clean, use only approved cleaning products or clean with a dry cloth.

3. CompactFlash: Turn off the unit's power before inserting or removing a CompactFlash storage card.

Conventions Used in this Manual

Warning:
Information about certain situations, which if not observed, can cause personal injury. This will prevent injury to yourself when performing a task.

Caution:
Information to avoid damaging components or losing data.

Note:
Provides additional information to complete a task easily.

Safety Warning: This equipment is intended for installation in a Restricted Access Location only.

CHAPTER 1: PRODUCT INTRODUCTION

NISE 3900E Overview

Front View

Rear View

Key Features

- Support 8th & 9th generation Intel® Core™ i7/i5/i3 LGA socket type embedded processor

- Intel® Q370 PCH

- Support 1 x 2.5" SATA HDD

- 1 x DVI-D, 1 x DP, and 1 x HDMI with independent display support

- Three Intel® GbE LAN ports; support WoL, teaming and PXE

- 1 x External M.2 socket and 1 x SIM card socket

- 6 x USB 3.0, 4 x USB 2.0, 2 x RS232/422/485 with auto flow control

- 1 x Internal mini-PCIe socket supports optional Wi-Fi/3.5G/4G LTE

- Support +9V to 30VDC input; ATX power mode

- One PCIe x4 expansion

NISE 3900E Hardware Specifications

CPU Support

- Support 8th & 9th generation Intel® Core™ i7/i5/i3 LGA socket type embedded processor
  - Intel® Core™ i7-9700TE, 8 Core, 1.8GHz, 12M Cache
  - Intel® Core™ i5-9500TE, 6 Core, 2.2GHz, 9M Cache
  - Intel® Core™ i3-9100TE, 4 Core, 2.2GHz, 6M Cache
  - Intel® Core™ i7-8700T, 6 Core, 2.4GHz, 12M Cache
  - Intel® Core™ i5-8500T, 6 Core, 2.1GHz, 9M Cache
  - Intel® Core™ i3-8100T, 4 Core, 3.1GHz, 6M Cache
- Turbo-boost disabled by default

Main Memory

- 2 x DDR4 2400/2666 SO-DIMM sockets, support up to 32GB with un-buffered and non-ECC

Display Option

- Three independent display
  - HDMI + DP + DVI-D
- Dual independent display
  - HDMI + DP
  - HDMI + DVI-D
  - DP + DVI-D

Front I/O Interface Status LEDs

- 3 x LAN active LEDs
- 2 x GPO status/COM1/2 TX/RX LEDs
- 1 x HDD access LEDs
- 1 x Battery low
- 1 x M.2

Front I/O Interface

- 1 x ATX power on/off switch
- 1 x DP
- 1 x Line-out and 1 x Mic-in
- 2 x Antenna holes
- 1 x External M.2 socket (M-key)
- 1 x SIM card holder
- 4 x USB 2.0 ports (500mA per each)

Rear I/O Interface

- 2 x DB9 for COM1 & COM2
  - COM1: RS232/422/485 auto flow control
  - COM2: RS232/422/485 auto flow control
- 6 x USB 3.0 ports (900mA per each)
- 1 x DVI-D port
- 1 x HDMI port
- 2 x Intel® I210-IT GbE LAN ports; support WoL, teaming and PXE
- 1 x Intel® I219-LM GbE LAN port
- 1 x 3-pin remote power on/off switch
- +9V to 30V DC input

Internal I/O

- COM3/COM4: internal box header, support RS232 only
- 8CH GPIO: internal pin header, supports 4 x GPO and 4 x GPI, TTL 5V level
- Onboard TPM2.0 (SLB9665) for data encryption purposes
- 1 x Internal M.2 (B-key), supports optional LTE

Storage Device

- 1 x External M.2 socket (M-key SATA 3.0, PCIe x4)
- 1 x 2.5" HDD or SSD (SATA 3.0) drive bay

Expansion Slot

- One PCIe x4 expansion slot
  - Add-on card length: 169mm max.
  - Power consumption: 10W/slot max.
- 1 x Internal mini-PCIe socket supports optional Wi-Fi/3.5G/4G LTE

Power Requirements

- AT/ATX power mode (default: ATX power mode)
- Power input: +9 to +30V DC
- Power adapter: optional AC to DC power adapter (24V DC, 120W)

Dimensions

- 215mm (W) x 272mm (D) x 94mm (H) without wall mount bracket (8.5" x 10.7" x 3.7")

Construction

- Aluminum and metal chassis with fanless design

Environment

- Operating temperature:
  Ambient with air flow: -5°C to 55°C
  (According to IEC60068-2-1, IEC60068-2-2, IEC60068-2-14)
- Storage temperature: -20°C to 80°C
- Relative humidity: 10% to 95% (non-condensing)
- Shock protection:
  - HDD: 20G, half sine, 11ms, IEC60068-2-27
  - M.2: 50G, half sine, 11ms, IEC60068-2-27
- Vibration protection with HDD condition:
  - Random: 0.5Grms @ 5~500 Hz, IEC60068-2-64
  - Sinusoidal: 0.5Grms @ 5~500 Hz, IEC60068-2-6

- Vibration protection with SSD & M.2 condition:
  - Random: 2Grms @ 5~500 Hz, IEC60068-2-64
  - Sinusoidal: 2Grms @ 5~500 Hz, IEC60068-2-6

Certifications

- CE approval- EN61000-6-2- EN61000-6-4
- FCC Class A

OS Support List

- Windows 10 64-bit
- Linux Kernel 4.9

Weight Information

- Gross weight: 6.54kg
- Net weight: 5kg

  - COM1: RS232/422/485 auto flow control
  - COM2: RS232/422/485 auto flow control
- 6 x USB 3.0 ports (900mA per each)
- 1 x DVI-D port
- 1 x HDMI port
- 2 x Intel® I210-IT GbE LAN ports; support WoL, teaming and PXE
- 1 x Intel® I219-LM GbE LAN port
- 1 x 3-pin remote power on/off switch
- +9V to 30V DC input

Internal I/O

- COM3/COM4: internal box header, support RS232 only
- 8CH GPIO: internal pin header, support 4 x GPO and 4 x GPI, TTL 5V level
- Onboard TPM2.0 (SLB9665) for data encryption purposes
- 1 x Internal M.2 (B-key), supports optional LTE

Storage Device

- 1 x External M.2 socket (M-key SATA 3.0, PCIe x4)
- 1 x 2.5" HDD or SSD (SATA 3.0) drive bay

Expansion Slot

- NISE 3900E2: two PCIe x4 expansion slots
  - Add-on card length: one 169mm max, and one 240mm max.
  - Power consumption: 10W/slot max
- NISE 3900P2: two PCI expansion slots
  - Add-on card length: one 169mm max, and one 240mm max.
  - Power consumption: 10W/slot max
- NISE 3900P2E: one PCIe x4 and one PCI expansion slot
  - Add-on card length: one 169mm max for PCIe x4, and one 240mm max for PCI
  - Power consumption: 10W/slot max
- 1 x Internal mini-PCIe socket supports optional Wi-Fi/3.5G/4G LTE

Power Requirements

- AT/ATX power mode (default: ATX power mode)
- Power input: +9 to +30V DC
- Power adapter: optional AC to DC power adapter (24V DC, 120W)

Dimensions

- 215mm (W) x 272mm (D) x 94mm (H) without wall mount bracket (8.5" x 10.7" x 4.5")

Construction

- Aluminum and metal chassis with fanless design

Environment

- Operating temperature:
  Ambient with air flow: -5°C to 55°C
  (According to IEC60068-2-1, IEC60068-2-2, IEC60068-2-14)

- Storage temperature: -20°C to 80°C
- Relative humidity: 10% to 95% (non-condensing)
- Shock protection:
  - HDD: 20G, half sine, 11ms, IEC60068-2-27
  - M.2: 50G, half sine, 11ms, IEC60068-2-27
- Vibration protection with HDD condition:
  - Random: 0.5Grms @ 5~500 Hz, IEC60068-2-64
  - Sinusoidal: 0.5Grms @ 5~500 Hz, IEC60068-2-6
- Vibration protection with SSD & M.2 condition:
  - Random: 2Grms @ 5~500 Hz, IEC60068-2-64
  - Sinusoidal: 2Grms @ 5~500 Hz, IEC60068-2-6

Certifications

- CE approval- EN61000-6-2- EN61000-6-4
- FCC Class A

OS Support List

- Windows 10 64-bit
- Linux Kernel 4.9

Weight Information

- Gross weight: 6.84kg
- Net weight: 5.3kg

NISE 3900E-H310 Overview

Front View

Rear View

Key Features

- Support 8th & 9th generation Intel® Core™ i7/i5/i3 LGA socket type embedded processor

- Intel® H310 PCH

- Support 1 x 2.5" SATA HDD

- 1 x DVI-D and 1 x HDMI with independent display support

- Two Intel® GbE LAN ports

- 1 x External M.2 socket and 1 x SIM card socket

- 4 x USB 3.0, 2 x USB 2.0, 2 x RS232/422/485 with auto flow control

- 2 x Internal mini-PCIe sockets support optional Wi-Fi/3.5G/4G LTE

- Support +9V to 30VDC input; ATX power mode

- One PCIe x4 expansion

NISE 3900E-H310 Hardware Specifications

CPU Support

- Support 8th & 9th generation Intel® Core™ i7/i5/i3 LGA socket type embedded processor
  - Intel® Core™ i7-9700TE, 8 Core, 1.8GHz, 12M Cache
  - Intel® Core™ i5-9500TE, 6 Core, 2.2GHz, 9M Cache
  - Intel® Core™ i3-9100TE, 4 Core, 2.2GHz, 6M Cache
  - Intel® Core™ i7-8700T, 6 Core, 2.4GHz, 12M Cache
  - Intel® Core™ i5-8500T, 6 Core, 2.1GHz, 9M Cache
  - Intel® Core™ i3-8100T, 4 Core, 3.1GHz, 6M Cache
- Turbo-boost disabled by default

Main Memory

- 2 x DDR4 2400/2666 SO-DIMM sockets, support up to 32GB with un-buffered and non-ECC

Display Option

- Two independent display
  - HDMI + DVI-D

Front I/O Interface Status LEDs

- 3 x LAN active LEDs
- 2 x GPO status/COM1/2 TX/RX LEDs
- 1 x HDD access LEDs
- 1 x Battery low
- 1 x M.2

Front I/O Interface

- 1 x ATX power on/off switch
- 1 x Line-out and 1 x Mic-in
- 2 x Antenna holes

- 1 x External M.2 socket (M-key)
- 1 x SIM card holder
- 2 x USB 2.0 ports (500mA per each)

Rear I/O Interface

- 2 x DB9 for COM1 & COM2
  - COM1: RS232/422/485 auto flow control
  - COM2: RS232/422/485 auto flow control
- 4 x USB 3.1 ports (900mA per each)
- 1 x DVI-D port
- 1 x HDMI port
- 2 x Intel® I210AT GbE LAN ports; support WoL, teaming and PXE
- 1 x 3-pin remote power on/off switch
- +9V to 30V DC input

Internal I/O

- COM3/COM4: internal box header, support RS232 only
- 8CH GPIO: internal pin header, support 4 x GPO and 4 x GPI, TTL 5V level
- Onboard TPM2.0 (SLB9665) for data encryption purposes
- 1 x Internal M.2 (B-key), supports optional LTE

Storage Device

- 1 x Internal M.2 socket (M-key SATA 3.0)
- 1 x 2.5" HDD or SSD (SATA 3.0) drive bay

Expansion Slot

- One PCIe x4 expansion slot
  - Add-on card length: 169mm max.
  - Power consumption: 10W/slot max.
- 1 x Internal mini-PCIe socket support optional Wi-Fi/3.5G/4G LTE

Power Requirements

▪ AT/ATX power mode (default: ATX power mode)
▪ Power input: +9 to +30V DC
▪ Power adapter: optional AC to DC power adapter (24V DC, 120W)

Dimensions

▪ 215mm (W) x 272mm (D) x 94mm (H) without wall mount bracket (8.5" x 10.7" x 3.7")

Construction

▪ Aluminum and metal chassis with fanless design

Environment

▪ Operating temperature:
Ambient with air flow: -5°C to 55°C
(According to IEC60068-2-1, IEC60068-2-2, IEC60068-2-14)
▪ Storage temperature: -20°C to 80°C
▪ Relative humidity: 10% to 95% (non-condensing)
▪ Shock protection:
  – HDD: 20G, half sine, 11ms, IEC60068-2-27
  – M.2: 50G, half sine, 11ms, IEC60068-2-27
▪ Vibration protection with HDD condition:
  – Random: 0.5Grms @ 5~500 Hz, IEC60068-2-64
  – Sinusoidal: 0.5Grms @ 5~500 Hz, IEC60068-2-6
▪ Vibration protection with SSD & M.2 condition:
  – Random: 2Grms @ 5~500 Hz, IEC60068-2-64
  – Sinusoidal: 2Grms @ 5~500 Hz, IEC60068-2-6

Certifications

▪ CE approval- EN61000-6-2- EN61000-6-4
▪ FCC Class A

OS Support List

▪ Windows 10 64-bit
▪ Linux Kernel 4.9

Knowing Your NISE 3900 Series

NISE 3900E & NISE 3900R Front Panel
Antenna Hole

The external antenna mounting holes are used to mount and connect optional external antennas.

Line-out

Used to connect a headphone or a speaker.

Mic-in

Used to connect an external microphone.

USB 2.0

Used to connect USB 2.0/1.1 devices.

DisplayPort

Used to connect a DisplayPort interface monitor.

M.2 and SIM Card Slot

Used to install an M.2 and a SIM card.

LED Indicators

Indicates the COM port, LAN, GPO, storage and M.2 activity as well as the low battery status of the system.

Power Switch

Press to power-on or power-off the system.

Bracket Tray

9V-30V DC Input
Used to plug a DC power cord.

Remote On/Off Switch
Used to connect a remote to power on/off the system.

COM1 & COM2
Two DB9 ports used to connect RS232/422/485 compatible devices.

LAN1/LAN2/LAN3
Used to connect the system to a local area network.

USB 3.0
Used to connect USB 3.0/2.0 devices.

DVI-D
Used to connect a DVI-D interface monitor.

HDMI
Used to connect a HDMI interface monitor.

PCIe x4 (Expansion Slot)
NISE 3900E: One PCIe x4 expansion slot used to install add-on cards.

Bracket Tray (NISE 3900R)
Removable bracket tray used to install two 2.5" storage drives.

NISE 3900E-H310 Front Panel
Antenna Hole

The external antenna mounting holes are used to mount and connect optional external antennas.

Line-out

Used to connect a headphone or a speaker.

Mic-in

Used to connect an external microphone.

CHAPTER 2: JUMPERS AND CONNECTORS

This chapter describes how to set the jumpers and connectors on the NISE 3900 series motherboard.

Before You Begin

- Ensure you have a stable, clean working environment. Dust and dirt can get into components and cause a malfunction. Use containers to keep small components separated.

- Adequate lighting and proper tools can prevent you from accidentally damaging the internal components. Most of the procedures that follow require only a few simple tools, including the following:
  – A Philips screwdriver
  – A flat-tipped screwdriver
  – A set of jewelers screwdrivers
  – A grounding strap
  – An anti-static pad

- Using your fingers can disconnect most of the connections. It is recommended that you do not use needle-nosed pliers to disconnect connections as these can damage the soft metal or plastic parts of the connectors.

- Before working on internal components, make sure that the power is off. Ground yourself before touching any internal components, by touching a metal object. Static electricity can damage many of the electronic components. Humid environments tend to have less static electricity than dry environments. A grounding strap is warranted whenever danger of static electricity exists.

Precautions

Computer components and electronic circuit boards can be damaged by discharges of static electricity. Working on computers that are still connected to a power supply can be extremely dangerous.

Follow the guidelines below to avoid damage to your computer or yourself:
- Always disconnect the unit from the power outlet whenever you are working inside the case.

- If possible, wear a grounded wrist strap when you are working inside the computer case. Alternatively, discharge any static electricity by touching the bare metal chassis of the unit case, or the bare metal body of any other grounded appliance.

- Hold electronic circuit boards by the edges only. Do not touch the components on the board unless it is necessary to do so. Don't flex or stress the circuit board.

- Leave all components inside the static-proof packaging that they shipped with until they are ready for installation.

- Use correct screws and do not over tighten screws.

23 NISE 3900 Series User Manual

Jumper Settings

A jumper is the simplest kind of electric switch. It consists of two metal pins and a cap. When setting the jumpers, ensure that the jumper caps are placed on the correct pins. When the jumper cap is placed on both pins, the jumper is short. If you remove the jumper cap, or place the jumper cap on just one pin, the jumper is open.

Refer to the illustrations below for examples of what the 2-pin and 3-pin jumpers look like when they are short (on) and open (off).

Two-Pin Jumpers: Open (Left) and Short (Right)
Three-Pin Jumpers: Pins 1 and 2 are Short
Locations of the Jumpers and Connectors for the NISE 3900 Series

The figure below is the top view of the main board used in the NISE 3900 series. It shows the locations of the jumpers and connectors.
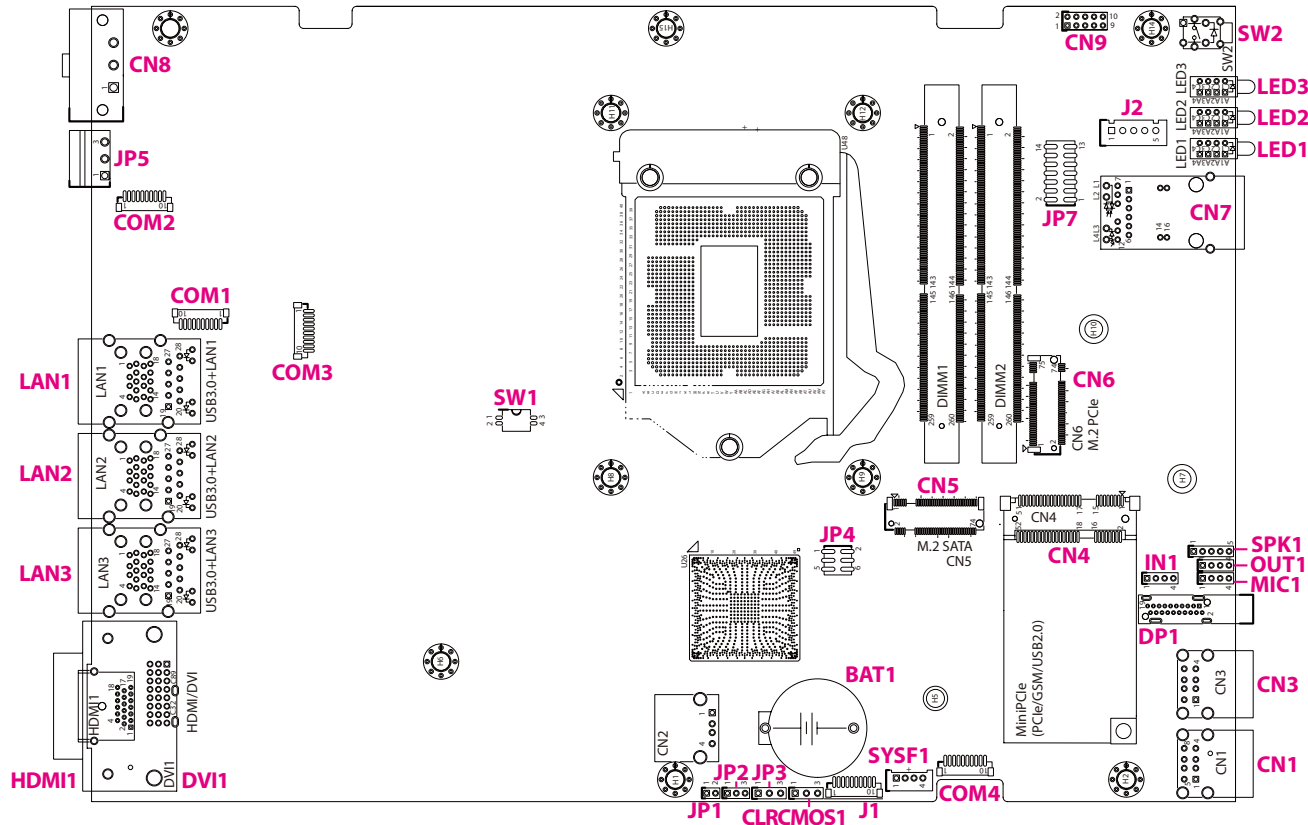

The figure below is the bottom view of the main board.

CHAPTER 3: SYSTEM SETUP

Removing the Top Cover

CAUTION! Prior to removing the chassis cover, make sure the unit's power is off and disconnected from the power sources to prevent electric shock or system damage.

1. Remove the 4 screws on the sides.

2. Remove the 4 screws on the top.
3. With the screws removed, lift up the cover and remove it from the chassis.

4. When reinstalling the top cover to the system, ensure that the 4 mounting holes on the top cover is aligned correctly to the four copper standoffs around the CPU socket.

52 NISE 3900 Series User Manual
Removing the Bottom Cover

1. Locate the 6 screws on the bottom cover.
2. Remove the screws then lift up the bottom cover and remove it from the chassis.

53 NISE 3900 Series User Manual
Installing a CPU

1. Locate the CPU socket on the board. Unlock the socket by pushing the load lever down, moving it sideways until it is released from the retention tab.
Load Lever   **Retention Tab**

2. Lift the load lever up to open the CPU retention bracket.
3. Insert the CPU into the socket. The triangular edge on the CPU must align
   with the corner of the CPU socket shown on the photo.
The CPU's notch will at
the same time fit into the
socket's alignment key.

Alignment Key

Alignment Key

CAUTION!
- Handle the CPU by its edges and avoid touching the pins.
- The CPU will fit in only one orientation and can easily be
  inserted without exerting any force.

4. With the CPU installed, close the retention bracket and then hook the load lever under the retention tab. Ensure that the notch on the retention bracket is slid under the screw before lowering the load lever as shown below.

Screw

Notch
CAUTION! Do not force the CPU into the socket. Forcing the CPU into the socket may bend the pins and damage the CPU.

Installing a Mini-PCIe Module

1. Locate the mini-PCIe slot on the board.
2. Insert the module into the mini-PCIe slot at a 30-degree angle.

Mini-PCIe Slot
Mini-PCIe Module

3. Push the module down and then secure it with a mounting screw.
Installing an M.2 Module (Internal)

1. Locate the m.2 slot on the board.
M.2 Slot

2. Insert the M.2 module into the slot at a 30-degree angle.

M.2 Module

3. Push the module down and then secure it with a mounting screw.
Installing a SO-DIMM Memory Module

Remove the top cover before installing a SO-DIMM module.

1. Locate the SO-DIMM sockets and release the locks.
SO-DIMM Sockets

2. Insert the SO-DIMM module into the socket and apply even pressure to both ends of the module until it slips into the socket. While pushing the module into position, the locks will close automatically.

61
NISE 3900 Series User Manual
Installing a SIM Card

1. Locate the SIM card holder on the front panel.

SIM

2. Push the yellow button on the SIM card holder. The SIM card holder will eject. Then place the SIM card into the SIM card holder and insert it back to the original position.
Installing an M.2 Card (External)

1. Locate the M.2 bracket cover on the front panel and unscrew the screws securing it. Then remove the bracket from the system.

2. Slide the M.2 module to the mounting plate on the M.2 bracket and secure it with a screw.

M.2 Bracket

3. Install the M.2 bracket back to its original position. Make sure the connector on the edge of the module is plugged firmly into the connector on the board.
Installing an Internal SATA Storage Drive (NISE 3900E/P2/P2E/E2/H310)

1. With the bottom cover of the chassis removed, unscrew the screws securing the storage bracket and lift it up.

2. Place the storage drive into the bracket and secure the drive with screws.
3. Connect the SATA connector to the storage drive and secure the storage bracket back to its original location. If the SATA power and data cables are higher than the chassis, please rearrange the cables so that they are inside the chassis, as shown by the dotted line below.
Fit cables below this dotted line   **SATA Connector**

Installing an External SATA Storage Drive (NISE 3900R)

1. On the rear side of NISE 3900R, loosen the screws on the SSD/HDD drive bay and slide the drive bay out.

2. Insert the storage drive into the drive bay with the SATA data and power connector facing towards the end. Then, while supporting the storage drive, turn the bracket to the other side. From the outside of the storage bracket, secure the drive in place with screws.
3. Insert the drive bay back in the SSD/HDD slot and tighten the screws to secure it in place.

Wallmount Brackets

The wallmount brackets provide a convenient and economical way of mounting the system on the wall.

1. The mounting holes are located at the bottom of the system. Secure the brackets on each side of the system using the provided mounting screws.

2. Secure the brackets to the system by inserting four retention screws (M6*10mm) into each bracket.

Secure the bracket to the system

Wallmount bracket
3. Now mount the system on the wall by fastening screws through the bracket's mounting holes.

Fasten screws to mount the system to the wall

CHAPTER 4: BIOS SETUP

This chapter describes how to use the BIOS setup program for the NISE 3900 series. The BIOS screens provided in this chapter are for reference only and may change if the BIOS is updated in the future.

To check for the latest updates and revisions, visit the NEXCOM website at www.nexcom.com.tw.

About BIOS Setup

The BIOS (Basic Input and Output System) Setup program is a menu driven utility that enables you to make changes to the system configuration and tailor your system to suit your individual work needs. It is a ROM-based configuration utility that displays the system's configuration status and provides you with a tool to set system parameters.

These parameters are stored in non-volatile battery-backed-up CMOS RAM that saves this information even when the power is turned off. When the system is turned back on, the system is configured with the values found in CMOS.

With easy-to-use pull down menus, you can configure such items as:
- Hard drives, diskette drives, and peripherals
- Video display type and display options
- Password protection from unauthorized use
- Power management features

The settings made in the setup program affect how the computer performs. It is important, therefore, first to try to understand all the setup options, and second, to make settings appropriate for the way you use the computer.

When to Configure the BIOS

- This program should be executed under the following conditions:
- When changing the system configuration
- When a configuration error is detected by the system and you are prompted to make changes to the setup program
- When resetting the system clock
- When redefining the communication ports to prevent any conflicts
- When making changes to the Power Management configuration
- When changing the password or making other changes to the security setup

Normally, CMOS setup is needed when the system hardware is not consistent with the information contained in the CMOS RAM, whenever the CMOS RAM has lost power, or the system features need to be changed.

70 NISE 3900 Series User Manual

Default Configuration

Most of the configuration settings are either predefined according to the Load Optimal Defaults settings which are stored in the BIOS or are automatically detected and configured without requiring any actions. There are a few settings that you may need to change depending on your system configuration.

Entering Setup
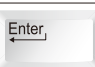

When the system is powered on, the BIOS will enter the Power-On Self Test (POST) routines. These routines perform various diagnostic checks; if an error is encountered, the error will be reported in one of two different ways:

- If the error occurs before the display device is initialized, a series of beeps will be transmitted.

- If the error occurs after the display device is initialized, the screen will display the error message.

Powering on the computer and immediately pressing <Del> allows you to enter Setup.

Press the ⬚Del key to enter Setup:

Legends

Key	Function
← →	Moves the highlight left or right to select a menu.
↑ ↓	Moves the highlight up or down between sub-menus or fields.
Esc	Exits the BIOS Setup Utility.
+	Scrolls forward through the values or options of the highlighted field.
−	Scrolls backward through the values or options of the highlighted field.
Tab	Selects a field.
F1	Displays General Help.
F2	Load previous values.
F3	Load optimized default values.
F4	Saves and exits the Setup program.
Enter	Press <Enter> to enter the highlighted sub-menu.

Scroll Bar

When a scroll bar appears to the right of the setup screen, it indicates that there are more available fields not shown on the screen. Use the up and down arrow keys to scroll through all the available fields.

Submenu
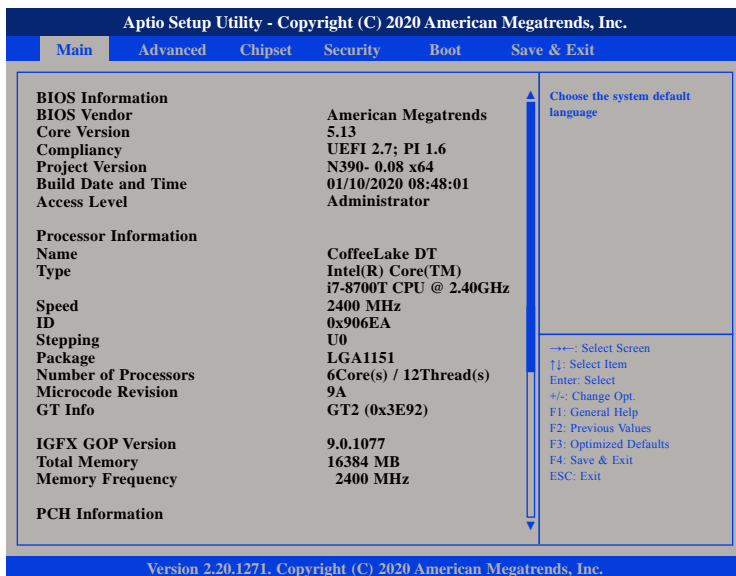

When "▶" appears on the left of a particular field, it indicates that a submenu which contains additional options are available for that field. To display the submenu, move the highlight to that field and press Enter↵ .

BIOS Setup Utility

Once you enter the AMI BIOS Setup Utility, the Main Menu will appear on the screen. The main menu allows you to select from several setup functions and one exit. Use arrow keys to select among the items and press Enter, to accept or enter the submenu.

Main

The Main menu is the first screen that you will see when you enter the BIOS Setup Utility.

System Language
Selects the language of the system.

System Date
The date format is <day>, <month>, <date>, <year>. Day displays a day, from Monday to Sunday. Month displays the month, from January to December. Date displays the date, from 1 to 31. Year displays the year, from 1999 to 2099.

System Time
The time format is <hour>, <minute>, <second>. The time is based on the 24-hour military-time clock. For example, 1 p.m. is 13:00:00. Hour displays hours from 00 to 23. Minute displays minutes from 00 to 59. Second displays seconds from 00 to 59.

Advanced

The Advanced menu allows you to configure your system for basic operation. Some entries are defaults required by the system board, while others, if enabled, will improve the performance of your system or let you set some features according to your preference.

⚠️ Setting incorrect field values may cause the system to malfunction.

↑↓: Select Item
Enter: Select
+/-: Change Opt.
F1: General Help
F2: Previous Values
F3: Optimized Defaults
F4: Save & Exit
ESC: Exit
```

CPU Temperature
Detects and displays the current CPU temperature.

System Temperature
Detects and displays the current system temperature.

Vcore to +5V
Detects and displays the output voltages.

USB Configuration

This section is used to configure the USB.

Advanced		

```
USB Configuration

USB Module Version          21

USB Controllers:
     1 XHCI
USB Devices:
     1 Keyboard, 1 Mouse

Legacy USB Support          [Enabled]
XHCI Hand-off               [Enabled]

USB hardware delays and time-outs:
Device reset time-out       [20 sec]
```

Enables Legacy USB support. AUTO option disables legacy support if no USB devices are connected. DISABLE option will keep USB devices available only for EFI applications.

```
→←: Select Screen
↑↓: Select Item
Enter: Select
+/-: Change Opt.
F1: General Help
F2: Previous Values
F3: Optimized Defaults
F4: Save & Exit
ESC: Exit
```

Legacy USB Support
Enabled   Enables Legacy USB.
Auto   Disables support for Legacy when no USB devices are connected.
Disabled   Keeps USB devices available only for EFI applications.

XHCI Hand-off
This is a workaround for OSs that does not support XHCI hand-off. The XHCI ownership change should be claimed by the XHCI driver.

Device reset time-out
Selects the USB mass storage device's start unit command timeout.

Chipset

This section gives you functions to configure the system based on the specific features of the chipset. The chipset manages bus speeds and access to system memory resources.

System Agent (SA) Configuration
System Agent (SA) parameters.

PCH-IO Configuration
PCH-IO parameters.

System Agent (SA) Configuration

This section is used to configure the System Agent (SA) configuration.
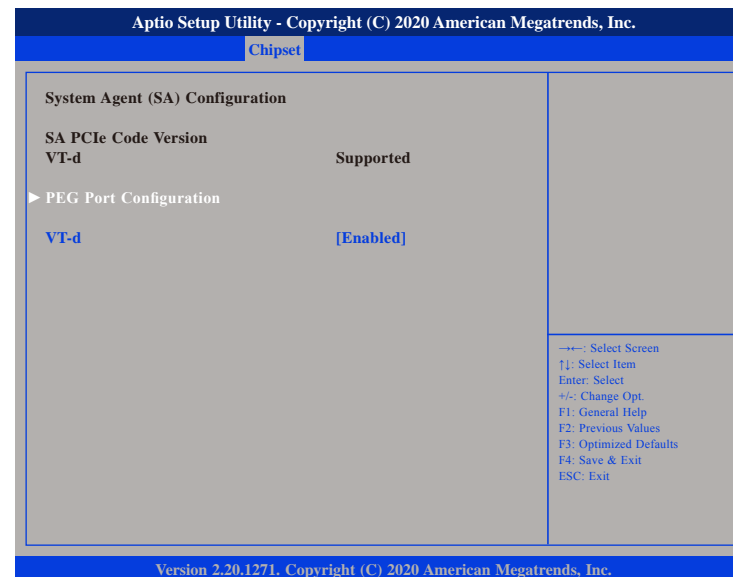

VT-d
Enables or disables VT-d function on MCH.

PEG Port Configuration

```
              Aptio Setup Utility - Copyright (C) 2020 American Megatrends, Inc.
                 Chipset

   PEG Port Configuration                                      Enable or Disable the Root Port

   PEG 0:1:0                        Not Present
     Enable Root Port              [Auto]
     Max Link Speed                [Auto]
   PEG 0:1:1                        Not Present
     Enable Root Port              [Enabled]
     Max Link Speed                [Auto]
   PEG 0:1:2                        Not Present
     Enable Root Port              [Enabled]
     Max Link Speed                [Auto]

                                                            →←: Select Screen
                                                            ↑↓: Select Item
                                                            Enter: Select
                                                            +/-: Change Opt.

    Setup Prompt Timeout              1                         setup activation key.
    Bootup NumLock State              [On]                      65535(0xFFFF) means indefinite
    Quiet Boot                        [Disabled]                waiting.

    Boot Option Priorities
    Boot Option #1                    [UEFI: Built-in EFI
                                      Shell]
    Fast Boot                         [Disabled]

                                                                →←: Select Screen
                                                                ↑↓: Select Item
                                                                Enter: Select
                                                                +/-: Change Opt.
                                                                F1: General Help
                                                                F2: Previous Values
                                                                F3: Optimized Defaults
                                                                F4: Save & Exit
                                                                ESC: Exit

           Version 2.20.1271. Copyright (C) 2020 American Megatrends, Inc.
```

Setup Prompt Timeout
Selects the number of seconds to wait for the setup activation key.
65535(0xFFFF) denotes indefinite waiting.

Bootup NumLock State
This allows you to determine the default state of the numeric keypad. By default, the system boots up with NumLock on wherein the function of the numeric keypad is the number keys. When set to Off, the function of the numeric keypad is the arrow keys.

Quiet Boot
Enabled   Displays OEM logo instead of the POST messages.
Disabled   Displays normal POST messages.

Boot Option Priorities
Adjusts the boot sequence of the system. Boot Option #1 is the first boot device that the system will boot from, next will be #2 and so forth.

Fast Boot
Enables or disables fast boot technology to speed up the system boot time. This is achieved by skipping specific tests during BIOS POST routine.
