

# CONFIGURATION – INTEGRATION COMPONENT-SETS

For installation in your developed device, it is possible to order all required components in one set. You determine the scope of the bundle and we guarantee the compatibility and tested functionality.

# INTEGRATION COMPONENT-SET

## OVERVIEW

### COMPONENT-SET

When searching for the right computer components for installation in your developed device or system, we support you with component sets that are put together completely individually for your requirements.

### YOUR ADDED VALUE

- > No compability problems
- > No DOA (Dead on Arrival)
- > No internal logistics required

### SELECTION

When selecting suitable components, we advise you on your requirements and always consider compatibility as well as a good price-performance ratio.

### COMPILATION

The component kits are individually created for you and are provided with their own item number so that you have an easy ordering process. You will receive each component kit in a separate box so that you can easily send the kit to its next destination.

### TEST

Each kit is tested by us together for compatibility and function, so you can be sure that all components work together.

### PRODUCT-LIFECYCLE

And of course we also monitor all components with regard to version changes, discontinuations and delivery bottlenecks. If you wish, we can also keep an agreed quantity for you in our warehouse.

Ordering description	Integration Component-Set
Ordering number	R10253
