Introduction

Product Description

MI808 is a Mini ITX board (170mm x 170mm) that comes with the Intel Intel® Pentium® N3000 series processor. It has two DDR3L SO-DIMM sockets supporting up to 8GB of system memory.

It also features the Intel® Gen8-LP graphics engine with interface for CRT, DVI-D and 24-bit dual channel LVDS displays.

The platform provides four USB 3.0 connector at the board edge and USB 2.0 two ports with pin header. Two SATA III ports are included.

MI808 FEATURES

- Mini ITX form factor, 170mm x 170mm
- Onboard Intel® Pentium® N3000 series
- Two DDR3L SO-DIMM sockets, DDR3L-1600, Max. 8GB
- Intel® Gen8-LP graphics for CRT, DVI-D interface
- 24-bit dual channel LVDS interface
- Dual Intel I211-AT PCIe Gigabit LAN
- 4x USB 3.0 on edge, 2xUSB 2.0 support
- Two SATA III, 4x COM ports
- Digital I/O 4-in / 4-out, PCIe (1x) slot, 2x Mini-PCIe
- Watchdog Timer, iSMART, RoHS compliance

Checklist

Your MI808 package should include the items listed below.

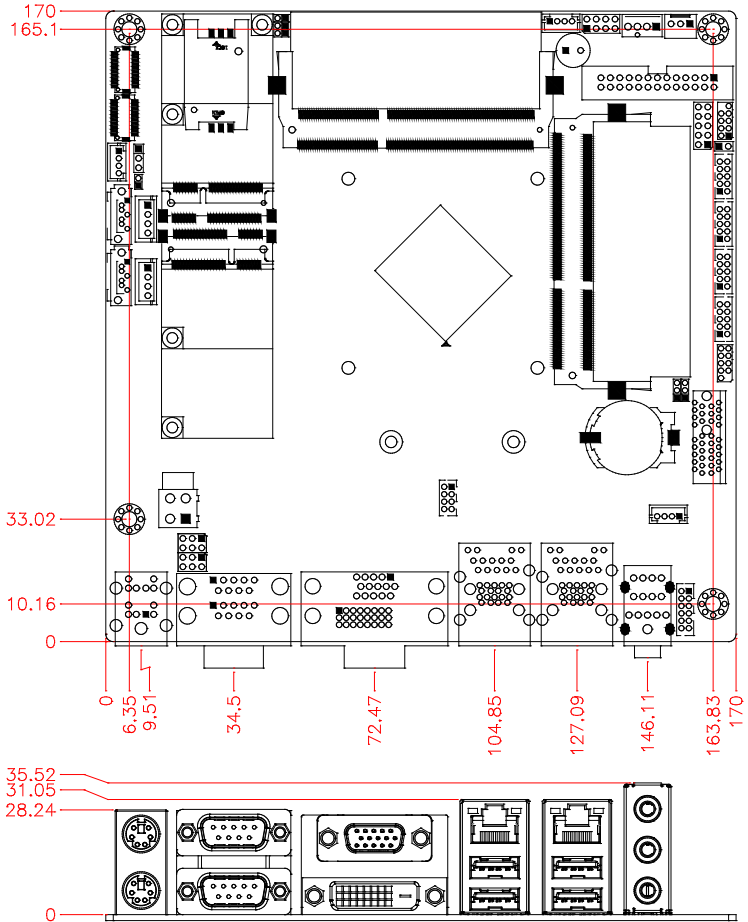

- The MI808 Mini-ITX motherboard
- This User's Manual
- 1 CD containing chipset drivers and flash memory utility
- Serial ATA cable
- I/O shield

MI808 Specifications

Product Name	MI808F-370 (N3700 onboard, DC-in 12V only) MI808FW-370 (N3700 onboard DC-in 18V~24V, wider range) MI808F-300(N3000 onboard DC-in 12V only) MI808FW-300 (N3000 onboard DC-in 18V~24V, wider range) MI808FW-370A (N3700 onboard DC-in 18V~24V, Non-TPM/CFast) [Default silk screen model # on PCB is MI808F]
Form Factor	Mini-ITX
SoC Type/Speed	14nm Lithography, FCBGA1170, Package= 25mm x 27mm - Pentium® N3700 QC, up to 2.4Ghz , TDP=6W - Celeron® N3000 DC, up to 2.08GHz, TDP=3W
BIOS	AMI BIOS
Memory	2 xDDR3L SO-DIMM socket [Horizontal type] Maximum to DDR3L-1600@8GB (Non-ECC, Unbuffered, 1.35V)
Display	Intel® Pentium® SoC integrated Gen 8-LP graphics core Supports DX11.1 & OpenGL 4.2, 3 x independent displays - VGA x 1(Thru NXP PTN3392) **Supports up to1920x1200 @ 60Hz - LVDS: 24-bit dual channel via NXP PTN3460 thru eDP **Supports up to1920x1200 @ 60Hz** - DVI-D x1 **Supports up to 3840x2160 @ 60 Hz**
LAN	Intel I211-AT PCIe Gigabit LAN x 2 **Reserved for external EEPROM**
USB	Intel® Braswell SoC built-in USB 3.0 host controller, supports 4 ports - Edge I/O x 4 Intel® Braswell SoC built-in USB 2.0 host controller with USB hub Renesas uPD720115K8-611-BAK-A(C013720115K861000P) For total 4 ports x USB 2.0 - 2 ports thru pin header - 2 ports thru Mini PCIe slot
Serial ATA Ports	Intel® Braswell SoC built-in SATA III controller, supports 2 ports - 2 x SATAIII connector - MSATA (thru Mini PCIe) via switch - CFast (Optional) via switch
Audio	Realtek ALC269QHD-VC3 with class-D speaker amplifier (2W per channel) Support 2-channel audio out + AMP
LPC I/O	Fintek F81846AD-I [128-pin LQFP, 14x14x1.4mm] COM #1 (RS232/422/485) supports ring-in with power @500mA (selectable for 5V or 12V) - [SP339EER1 232/422/485 transceiver x 1 for jumper-less] - COM #2 (RS232 only), support ring-in with power @500mA (selectable for 5V or 12V), with SP3243EBER - COM #3-COM #4 (RS232 only) with SP3243EBER [Hardware Monitor] 2 x Thermal inputs; 2 x Voltage monitoring 1 x 4-pin for CPU fan (PWM), 1 x 3-pin for SYS fan (DC mode)
Digital IO	4-in / 4-out (User configurable)
Expansion Slots	PCIe (1x) slot x 1 Full-sized Mini-PCIe x 2 [Mounting holes for full-sized (x2) + half-sized (x1)] Mini-PCIe #1 supports PCIe(1x) / USB signal Mini-PCIe #2 supports mSATA / USB signal CFast x 1 @ solder side [Except MI808FW-370A]

Edge Connector (The same as MI802)	PS/2 Keyboard + PS/2 mouse stack connector x 1 Dual DB9 Stack connector x1 for COM#1 / COM#2 VGA+ DVI-D stack connector x 1 for CRT + DVI-D RJ45+Dual USB 3.0 stack connector x 2 Audio 3-port connector x 1 (Line-out, Line-in, MIC)
Onboard Header/Connector	DF11-8 pin connector x 1 for USB (2.0) x 2 ports 2x6 pin header x 1 for front audio (2.54 pitch type) 2x13 pin box header x 1 for LPT DF11-10 pin box header x 4 for COM #3~# 6 DF20 socket connector x 2 for 24-bit dual channel LVDS 4 pins box header x1 for LCD backlight control SATA connector x 2 for SATA III device (Blue color) 4-pin power connector x 2 for SATA device 2x5 pin header x 1 for Digital I/O (2.54 pitch type) 4-pin header for speaker out (from ALC269 internal amplifier) 2x4 pin header x 1 for front I/O panel (2.54 pitch type) 2 x 2 pin connector x 1 for power-in SIM slot x 1 (Location under #1 MiniPCle)
Watchdog Timer	Yes (256 segments, 0, 1, 2...255 sec/min)
Power Connector	+12V only (±5 % tolerance) or 18V~+24V
Others	<ol style="list-style-type: none"> 1. iSMART 3.2 2. TPM 2.0 (Infineon SLB9665) [Except MI808FW-370A] 3. Heatsink for fanless solution
OS supporting	<ul style="list-style-type: none"> - Windows 8.1 (64-bit) - Window Embedded 8 - Windows 7 (64-bit) - Linux (Fedora, uBuntu)
RoHS	Yes
Certification	CE /FCC/LVD
Environment	Operation Temperature: 0~60 degree C Storage Temperature: -40 ~ 80 degree C Relative humidity: 90%, non-condensing @ 60 degree C
Board Size	170mm x 170mm

Board Dimensions

Installations

This section provides information on how to use the jumpers and connectors on the MI808 in order to set up a workable system. The topics covered are:

Installing the Memory	7
Setting the Jumpers.....	8
Connectors on MI808.....	15

Installing the Memory

The MI808 board supports two DDR3L-1600 memory slots.

Remarks:

MI808 supports two SO-DIMM (w/o ECC) modules. Total maximum memory supported is 8GB.

Installing and Removing Memory Modules

To install the DDR3L modules, locate the memory slot on the board and perform the following steps:

1. Hold the DDR3L module so that the key of the DDR3L module aligned with that on the memory slot.
2. Gently push the DDR3L module in an upright position until the clips of the slot close to hold the DDR3L module in place when the DDR3L module touches the bottom of the slot.

To remove the DDR3L module, press the clips with both hands.

Setting the Jumpers

Jumpers are used on MI808 to select various settings and features according to your needs and applications. Contact your supplier if you have doubts about the best configuration for your needs. The following lists the connectors on MI808 and their respective functions.

BIOS Setup

This chapter describes the different settings available in the Award BIOS that comes with the board. The topics covered in this chapter are as follows:

BIOS Introduction.....	34
BIOS Setup	34
Advanced Settings	35
CSM Configuration.....	44
Chipset Settings.....	46
Security Settings.....	48
Boot Settings.....	49
Save & Exit Settings.....	50

BIOS Introduction

The BIOS (Basic Input/Output System) installed in your computer system's ROM supports Intel processors. The BIOS provides critical low-level support for a standard device such as disk drives, serial ports and parallel ports. It also password protection as well as special support for detailed fine-tuning of the chipset controlling the entire system.

BIOS Setup

The BIOS provides a Setup utility program for specifying the system configurations and settings. The BIOS ROM of the system stores the Setup utility. When you turn on the computer, the BIOS is immediately activated. Pressing the key immediately allows you to enter the Setup utility. If you are a little bit late pressing the key, POST (Power On Self Test) will continue with its test routines, thus preventing you from invoking the Setup. If you still wish to enter Setup, restart the system by pressing the "Reset" button or simultaneously pressing the <Ctrl>, <Alt> and <Delete> keys. You can also restart by turning the system Off and back On again. The following message will appear on the screen:

```
Press <DEL> to Enter Setup
```

In general, you press the arrow keys to highlight items, <Enter> to select, the <PgUp> and <PgDn> keys to change entries, <F1> for help and <Esc> to quit.

When you enter the Setup utility, the Main Menu screen will appear on the screen. The Main Menu allows you to select from various setup functions and exit choices.

Warning: *It is strongly recommended that you avoid making any changes to the chipset defaults. These defaults have been carefully chosen by both AMI and your system manufacturer to provide the absolute maximum performance and reliability. Changing the defaults could cause the system to become unstable and crash in some cases.*

Controls the execution of UEFI and Legacy Video OpROM

Other PCI device

Determines OpROM execution policy for devices other than Network, Storage, or Video.

USB Configuration

Aptio Setup Utility

Main	Advanced	Chipset	Boot	Security	Save & Exit
USB Configuration					
USB Module Version			10		
USB Devices: 1 Drive, 1 Keyboard, 1 Hubs					
Legacy USB Support				Enabled	→ ← Select Screen
XHCI Hand-off				Enabled	↑ ↓ Select Item
EHCI Hand-off				Enabled	Enter: Select
USB Mass Storage Driver Support				Enabled	+ - Change Field
USB hardware delays and time-outs:					F1: General Help
USB Transfer time-out			20 sec	F2: Previous Values	
Device reset time-out			20 sec	F3: Optimized Default	
Device power-up delay			Auto	F4: Save	
					ESC: Exit

Legacy USB Support

Enables Legacy USB support.

AUTO option disables legacy support if no USB devices are connected. DISABLE option keeps USB devices available only for EFI applications.

XHCI Hand-off

This is a workaround for OSeS without XHCI hand-off support. The XHCI ownership change should be claimed by XHCI driver.

EHCI Hand-off

This is a workaround for OSeS without EHCI hand-off support. The EHCI ownership change should be claimed by EHCI driver.

USB Mass Storage Driver Support

Enable/Disable USB Mass Storage Driver Support.

USB Transfer time-out

The time-out value for Control, Bulk, and Interrupt transfers.

Device reset time-out

USB mass Storage device start Unit command time-out.

Device power-up delay

Maximum time the device will take before it properly reports itself to the Host Controller. 'Auto' uses default value: for a Root port it is 100ms, for a Hub port the delay is taken from Hub descriptor.

Quiet Boot		Disabled		F1: General Help	
Boot Option Priorities				F2: Previous Values	
New Boot Option Policy		Default		F3: Optimized Default	
				F4: Save	
				ESC: Exit	

Setup Prompt Timeout

Number of seconds to wait for setup activation key.

65535(0xFFFF) means indefinite waiting.

Bootup NumLock State

Select the keyboard NumLock state.

Quiet Boot

Enables/Disables Quiet Boot option.

Fast Boot

Enables/Disables boot with initialization of a minimal set of devices required to launch active boot option. Has no effect for BBS boot options.

Save Changes and Exit

Exit system setup after saving the changes.

Discard Changes and Exit

Exit system setup without saving any changes.

Save Changes and Reset

Reset the system after saving the changes.

Discard Changes and Reset

Reset system setup without saving any changes.

Save Changes

Save Changes done so far to any of the setup options.

Discard Changes

Discard Changes done so far to any of the setup options.

Restore Defaults

Restore/Load Defaults values for all the setup options.

Save as User Defaults

Save the changes done so far as User Defaults.

Restore User Defaults

Restore the User Defaults to all the setup options.

Drivers Installation

This section describes the installation procedures for software and drivers. The software and drivers are included with the motherboard. If you find the items missing, please contact the vendor where you made the purchase. The contents of this section include the following:

Intel Chipset Software Installation Utility	52
VGA Drivers Installation	55
Realtek HD Audio Driver Installation	57
LAN Drivers Installation.....	58
TXE Drivers Installation	61

IMPORTANT NOTE:

After installing your Windows operating system, you must install first the Intel Chipset Software Installation Utility before proceeding with the drivers installation.

Intel Chipset Software Installation Utility

The Intel Chipset Drivers should be installed first before the software drivers to enable Plug & Play INF support for Intel chipset components. Follow the instructions below to complete the installation.

1. Insert the disc that comes with the board. Click **Intel** and then **Intel(R) Braswell Chipset Drivers**.

2. Click **Intel(R) Chipset Software Installation Utility**

3. When the Welcome screen to the Intel® Chipset Device Software appears, click *Next* to continue.

4. Click **Accept** to accept the software license agreement and proceed with the installation process.

5. On the Readme File Information screen, click **Install** to continue the installation.

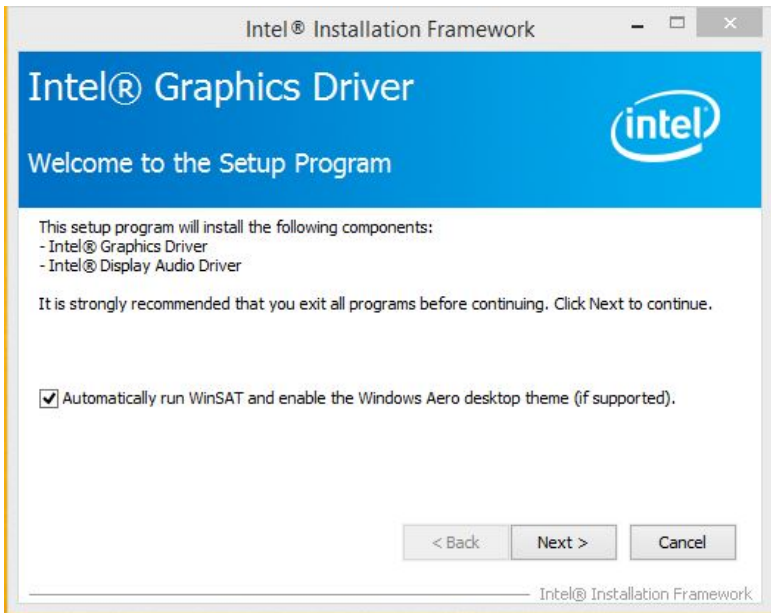

6. The Setup process is now complete. Click **Finish** to restart the computer and for changes to take effect.

VGA Drivers Installation

1. Click **Intel(R) Braswell Graphics Driver**

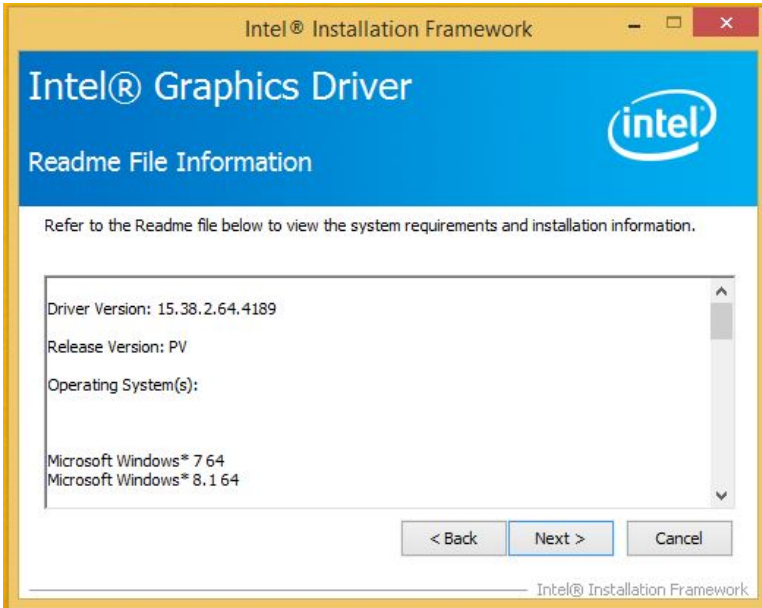

2. When the Welcome screen appears, click **Next** to continue.

3. Click **Yes** to agree with the license agreement and continue the installation.

4. On the Readme File Information screen, click *Next* to continue the installation of the Intel® Graphics Driver.

5. On Setup Progress screen, click *Next* to continue.

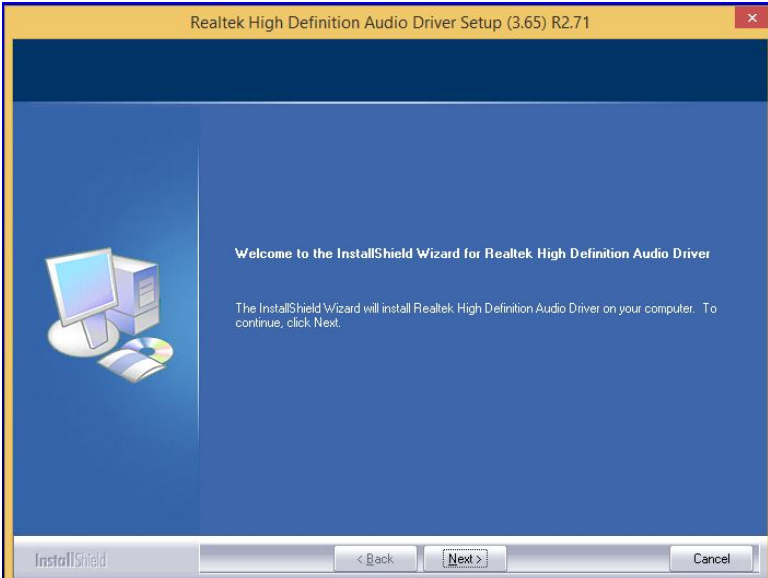

6. Setup complete. Click *Finish* to restart the computer and for changes to take effect.

Realtek HD Audio Driver Installation

1. Click *Realtek High Definition Audio Driver*.

2. On the Welcome to the InstallShield Wizard screen, click *Next* to proceed with and complete the installation process.

3. Restart the computer when prompted.

LAN Drivers Installation

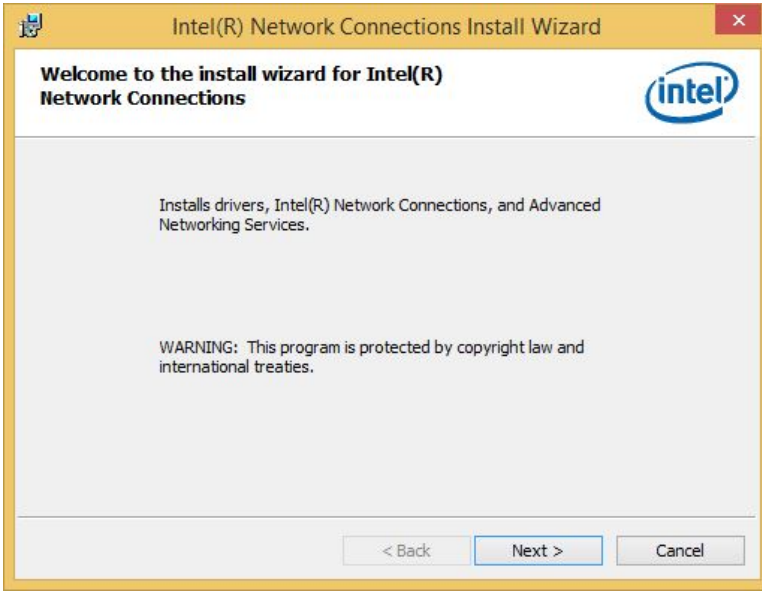

1. Insert the CD that comes with the board. Click **LAN Card** and then **Intel LAN Controller Drivers**.

2. Click **Intel(R) I21x Gigabit Network Drivers**

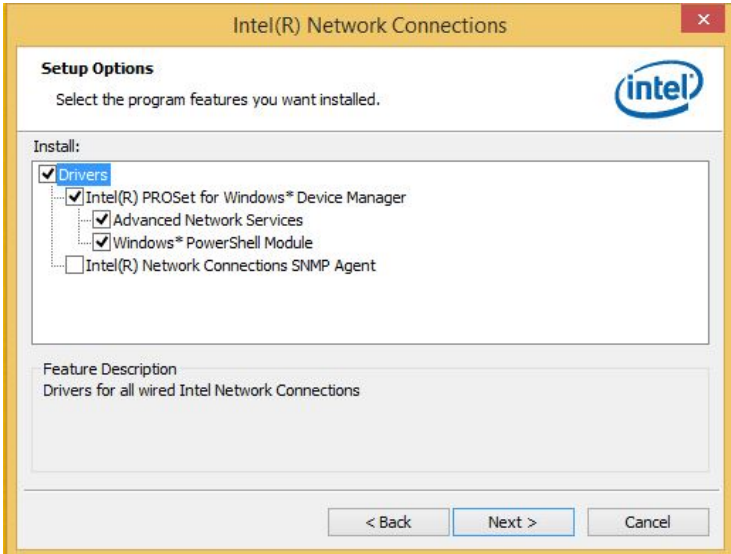

3. In the Welcome screen, click **Next**.

4. In the License Agreement screen, click ***I accept the terms in license agreement*** and ***Next*** to accept the software license agreement and proceed with the installation process.

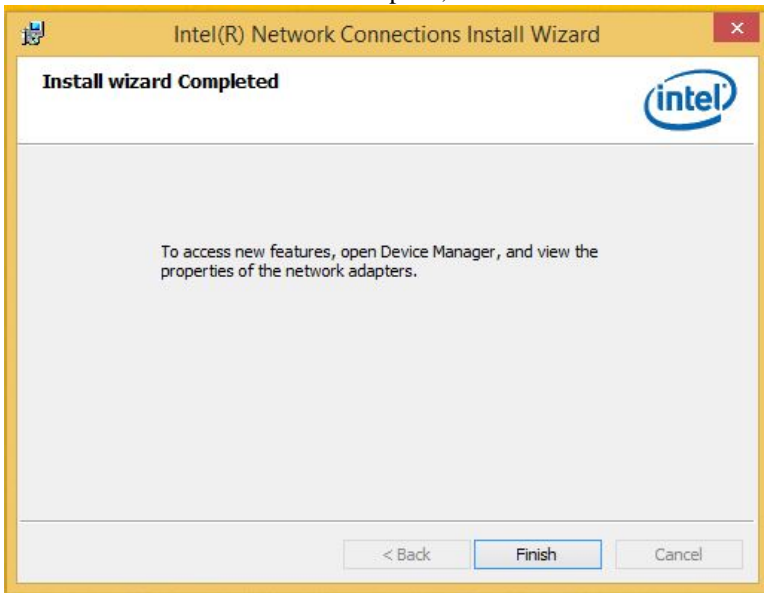

5. Click the checkbox for **Drivers** in the Setup Options screen to select it and click **Next** to continue.

6. When the Ready to Install the Program screen appears, click **Install** to continue.

7. When InstallShield Wizard is complete, click **Finish**.

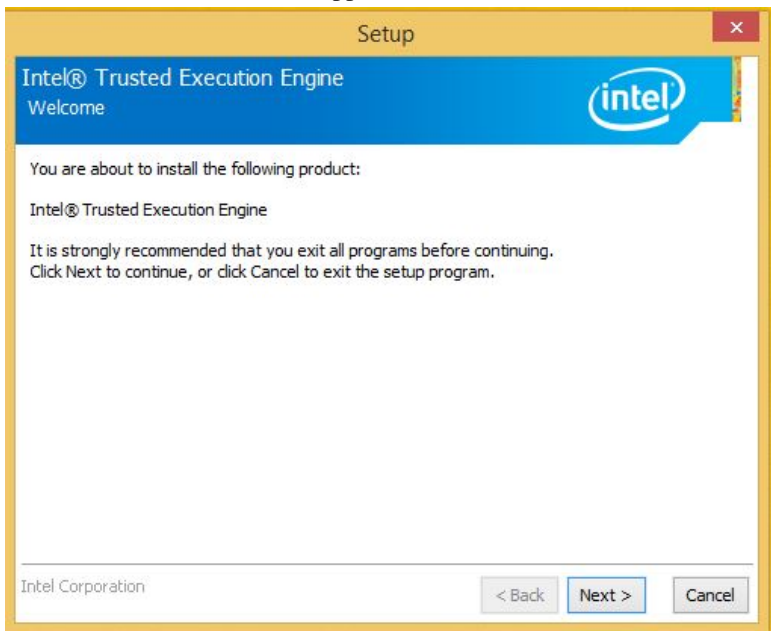

TXE Drivers Installation

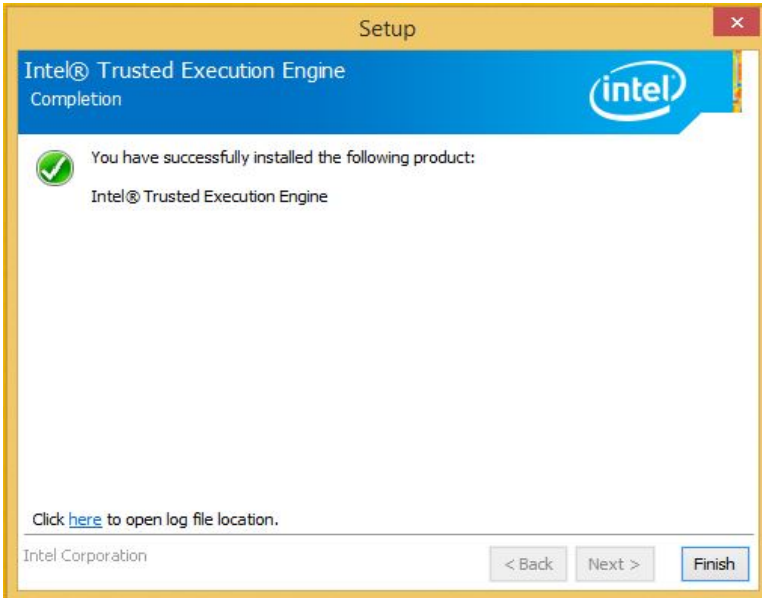

1. Click *Intel(R) TXE Driver*

2. When the Welcome screen appears, click *Next* to continue.

3. Click **Next** to agree with the license agreement and continue the installation.
4. On the Confirmation screen, click **Next** to continue the installation of the Intel(R) TXE Driver.
5. Setup complete. Click **Finish** to restart the computer and for changes to take effect.

Appendix

A. I/O Port Address Map

Each peripheral device in the system is assigned a set of I/O port addresses that also becomes the identity of the device. The following table lists the I/O port addresses used.

Address	Device Description
000h - 06Fh	PCI Express Root Complex
040h - 043h	System timer
070h - 077h	System CMOS/real time clock
2E8h - 2EFh	Communications Port (COM4)
2F8h - 2FFh	Communications Port (COM2)
378h - 37Fh	Printer Port (LPT1)
3B0h - 3BBh	Intel(R) HD Graphics
3E8h - 3EFh	Communications Port (COM3)
3F8h - 3FFh	Communications Port (COM1)
040h - 05Fh	Intel(R) Celeron(R)/Pentium(R) SM Bus Controller
060h - 07Fh	Standard SATA AHCI Controller

B. Interrupt Request Lines (IRQ)

Peripheral devices use interrupt request lines to notify CPU for the service required. The following table shows the IRQ used by the devices on board.

Level	Function
IRQ0	System timer
IRQ1	Standard PS/2 Keyboard
IRQ3	Communications Port (COM2)
IRQ4	Communications Port (COM1)
IRQ6	Communications Port (COM3)
IRQ10	Communications Port (COM4)
IRQ11	PS/2 Compatible Mouse
IRQ12	Intel(R) Celeron(R)/Pentium(R) SM Bus Controller
IRQ19	Standard SATA AHCI Controller

C. Watchdog Timer Configuration

The WDT is used to generate a variety of output signals after a user programmable count. The WDT is suitable for use in the prevention of system lock-up, such as when software becomes trapped in a deadlock. Under these sorts of circumstances, the timer will count to zero and the selected outputs will be driven. Under normal circumstance, the user will restart the WDT at regular intervals before the timer counts to zero.

SAMPLE CODE:
